Curing award, thereby making a much better quality of hay, and reversability, which allows the mower to be used on one aide of the piece or lot.

The light, little, cheap, pany mowers with four fest cutter bars that are offered to farmers will in a short time be considered good playthings for children. A man will not then waste his time and labor and the work of a pair of barses to using a mower making such allow work in cutting and curing grass. We say confidently it is the principle that will be universally adopted. Farmers who expect to buy mowers this very are negently solicited to test our machines.
